## New at Our Office... Two Proven Technologies that Restore, Tighten, Firm and Lift

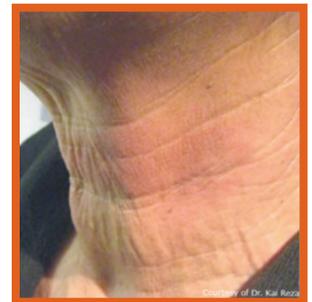

For years, there were 4 main technological categories in restorative dermatology:  
Non-Ablative (lasers, IPL, Fraxel, etc), Peels, Fillers and Neurorelaxants (Botox).  
This month, we are adding a 5th...Energy-Based Technologies, Pelleve and Ulthera!

**Cleared by the FDA for treating facial laxity, they do so much more. They stimulate and firm deep layers (dermis) of the skin without damaging the top layer.** It's remarkable that significant remodelling can take place without surgery and without a hiding period. We anticipate these new additions will be really helpful for several of our patient groups: **1.** Patients in their 40's to 50's who have not yet had plastic surgery and want to postpone it, **2.** Patients in their 50's to 60's who have had plastic surgery years ago and want to extend its results, **3.** Patients with loose skin after weight loss or pregnancy, **4.** Patients who have routinely used fillers and neurorelaxants and want something more holistic and long lasting. **Choosing the most effective treatment modality for each individual patient is key.** For this, of course, we need to see you in person. Read more about Pelleve and Ulthera below. **SCHEDULE A CONSULTATION TODAY. GREAT FOR MEN TOO! 310 370 5670**

## Pelleve' RadioFrequency Technology

Neck  
Before

### Pelleve Today. Out of the Town Tonight.

Pelleve uses time-tested radiofrequency technology to heat the deep layer of your skin, causing the collagen to contract, tighten and remodel.

Radiofrequency or RF has been used for years to tighten the tissue of the soft palate and cure the symptoms of sleep Apnea. It is safe and effective! No anesthetic is required. It is quite comfortable, even relaxing. 30-60 minute treatments. Full face or spot treatments. Immediate results are noted with full improvement in 60 days. 2 to 3 repeat treatments are recommended for top results. Improvements can last

18 months depending on patient profile. Side effects are rare; mild redness/puffiness have been seen. Usually these disappear quickly.

**GREAT FOR: sagging skin under the chin, wrinkles around the mouth, excess skin on the upper eyelid, crow's feet, chin & forehead lines, jawline laxity.**

# Ulthera Ultra-Sound Technology

Using Deep See® imaging technology to track placement, Ulthera delivers small, controlled amounts of ultrasound energy into the deep dermis. This novel ultrasound combination creates a new standard in aesthetic medicine.

## A Proven Technology. A Fresh Application.

For decades, ultrasound has been used to break up kidney stones without surgery and for innumerable other time-tested applications. With Ulthera, ultrasound therapy has made its foray into the field of aesthetic medicine.

Popular and effective, Ulthera works on the deep dermis, remodelling and tightening to counteract the effects of time and gravity. It lifts the brow, reduces the excess skin on the lids, opens up the eyes and gives a more refreshed appearance. Ulthera is a “stealth” procedure. It does not disturb the surface skin. It is also a progressive process. Results develop gradually. It’s wonderful for those who like to be “private” about having cosmetic work done. Great for those on-the-go.

Ultherapy® requires no special preparation or recuperation. Typically, patients enjoy some initial effect immediately following the procedure, but the ultimate lifting will take place over 2-3 months, as tired collagen is rejuvenated and supplemented with new, stronger collagen. It is not a replacement for the dramatic effects of plastic surgery, but Ultherapy® offers a ‘no downtime’ approach to improving skin laxity in a meaningful way.

Please note that the Ulthera® System underwent 510(k) “de novo” review by the FDA and was granted the first-ever ultrasound clearance for use in facial aesthetic improvement in 2009. It is specifically cleared for eyebrow lift. Other facial improvements have been clinically documented.

There are other promising off-label applications. **GREAT FOR: the classic eyebrow lift, laxity at the neck and jawline, décollete.** **CALL FOR CONSULTATION 310-370-5670**
